II LIAOCHENG MUNICIPALITY

Liaocheng City, hailed as "Water City in Northern China · Pearl of Two Rivers" and the location of Liaocheng University, is an important central city in western Shandong Province. It boasts over 5,000 years of civilized history and more than 2,500 years of urban construction history. As a National Famous Historical and Cultural City, it is the only city where the Yellow River and the Beijing-Hangzhou Grand Canal substantially converge. Prehistoric Longshan Culture, traditional Confucian Culture, Canal Commercial Culture, and Yellow River Agricultural Civilization have blended deeply here, nurturing over 400 cultural relics and historic sites as well as 12 national-level intangible cultural heritages, and forming an open and inclusive urban temperament.

Liaocheng is located at the junction of Shandong, Hebei, and Henan provinces, covering a total area of 8,628 square kilometers with a permanent population of 5.8 million. It enjoys a prominent transportation location: it is only a 1.5-hour drive from Jinan Yaoqiang International Airport, and the Beijing-Kowloon Railway, Jinan-Handan Railway, and multiple national expressways run through the city. The Zhengzhou-Jinan High-Speed Railway and Xiong'an-Shangqiu High-Speed Railway have been put into operation, a civil airport has been approved and is pending construction, and the Luxi International Inland Port connects domestic and foreign regions. Liaocheng is gradually becoming an important regional comprehensive transportation hub in North China, facilitating travel for international students.

As an international exchange city, Liaocheng is home to national-level international cooperation platforms such as the China-Pacific Island Countries Climate Change Cooperation Center and the China-CEEC Agricultural New Quality Productivity Demonstration Base. It has established friendly cooperative relations with 31 cities in 17 countries across four continents, boasting a strong atmosphere of international exchange. To facilitate the life of international students, 34 bank branches in the city provide bilingual services and foreign card acceptance, ensuring high living convenience.

Here, international students can immerse themselves in traditional Chinese culture: climb the Guangyue Tower (first built in the Northern Song Dynasty) to overlook the panoramic view of the ancient city, wander around Dongchang Lake to experience the water city scenery of "a city within a lake and a lake within a city", and participate in intangible cultural heritage experience activities such as paper cutting, Ejiao production, and Liaocheng Eight-Angle Drum. Liaocheng has successively won titles such as National Forest City, National Garden City, China Excellent Tourism City, and China Hot Spring City. With distinct seasons, beautiful environment, and social stability, it is an ideal place for international students to pursue further studies and experience culture.
